

# TELECOMMUNICATIONS

**CHRS, Inc.** is a nationally known and respected cultural resources firm, providing Cultural Resources work for a variety of telecommunications-tower projects located throughout the United States. Each project requires coordination with the appropriate State Historic Preservation Office (SHPO) as well as an understanding of the guidelines and procedures appropriate for that state. The level of effort and the information for the projects are set by the clients to meet the requirements of their individual projects. All cultural resources issues are considered. Projects are completed within 2 weeks in order to meet the client's turn-around time.

**CHRS, Inc.** provides full and partial 620/621 services, including e-106 submissions, for both co-locations and raw land sites. Our extensive experience with this type of work allows us to provide prompt services. Our recent work has extended into the following states, and we are continually expanding services into other states and regions:

- Arizona
- Arkansas
- California
- Colorado
- Connecticut
- Delaware
- District of Columbia
- Florida
- Georgia
- Hawaii
- Idaho
- Illinois
- Indiana
- Kentucky
- Louisiana
- Maryland
- Massachusetts
- Michigan
- Minnesota
- Missouri
- Montana
- Nevada
- New Hampshire
- New Jersey
- New Mexico
- New York
- North Carolina
- Ohio
- Oklahoma
- Oregon
- Pennsylvania
- Puerto Rico
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Virginia
- Washington
- West Virginia
- Wisconsin

Archaeological investigations include limited background research, file searches at the appropriate SHPO, and, if an area cannot be documented as previously disturbed, limited testing of the proposed tower sites. If required, a full range of specialized archaeological services are available.

The work also includes the evaluation of above-ground cultural resources. In addition to coordination with the appropriate SHPO, the evaluation of project Effects will be completed if required. If needed, specialized preservation services are also available, including research and documentation, as well as other mitigation measures.

**CHRS, Inc.** also conducts balloon tests, where necessary, to determine the potential effects on specific historic resources.

**CHRS, Inc.** maintains a competitive pricing arrangement, dependent on the location of the work and the quantity of sites assigned at a given time.
